

Hello Neighbor!

February 23, 2022

Clark Builders are part of the Integrated Project Delivery team who will be building the future St. Lorenzo Ruiz Middle School for Red Deer Catholic Regional Schools at 150 Kingston Drive.

As you may have noticed, we recently set up our site perimeter fence and have begun delivery of temporary facilities in preparation for the start of construction. As your new neighbor in Kentwood, we wanted to share some information about our construction plans.

You will begin to see increased construction activity during the early weeks of March 2022, and our current schedule shows us on-site for construction until the Summer of 2023. We are committed to being respectful and active members of the community during our stay in this neighborhood. Below is contact information for key members of our on-site team and we would encourage you to reach out directly with any concerns or questions that may arise throughout construction.

Also included below is the address to the future schools' website where we will be posting major updates and communications related to construction. We encourage you to check-in periodically for the most up to date information.

Sincerely,

Clark Builders and the St. Lorenzo Ruiz IPD Team,
